

Results and Performance

1. preprocessing.py - Preprocessing Raw Surgical Images

a. RAW => Processed Image Example (Ryder Needle Holder):

b. RAW => Processed Image Example (Ryder Needle Holder):

c. Test Image Example (Ryder Needle Holder):

2. sam2_mask_generator.py - Mask Generation with SAM2 + CLIP

3. sam2_surgical_mask.py – Precise Surgical Instrument Mask Generation

a. Keeping the Instrument's Color

b. Keeping the Background's Color

c. Black and White

4. generate_masks_with_sam.py – Binary Segmentation Masks

a. debakey_forceps_1.png

b. 1_4mm_dilators_1.png

c. right_angle_clamp_10.png

d. angled_bulldog_clamp_large_1.png

5. Model YOLO LoRA – YOLOv8 Custom Training Pipeline
